

Custom Coating

The Bayou Companies, through its partner Aegion Coating Services (ACS), is able to provide custom coating services on bends, fittings, fabricated spools, valves and short runs of straight pipe for oil, gas and potable water services.

Every phase of the project is important, which makes the ability to coat various sizes and shapes of pipe, bends, valves and other fabrications, both internally and externally with FBE, epoxy and urethanes a valuable resource for customers. ACS completes over 1,600 projects annually.

Types of Custom Coating Services and Coatings

- FBE and multilayer coatings
- Internal and external applications
- Plural component applications
- Internal efficiency and corrosion coatings
- Water pipe and pumps to AWWA specifications
- Jet fuel lines to mil-C-4556E
- Blast cleaning services
- Complete testing lab including D.S.C.
